Executive Summary

5 Jan - 26 Apr 2026

5,070

Total Leads (16 wks)

620

Total Bookings (16 wks)

£237k

Tracked Spend (PS + Print)

£383

Blended CPB

Key Findings

- Paid Ads is the workhorse - 65% of leads, 53% of bookings (16 wks). £199k spend / 330 bookings / £604 CPB.
- Post-tracking-fix DII Search is converting at £50 CPA vs PMax £65 (last 5 days). Search is now the cheaper, more controllable path.
- Paid Social scaled 6x but conversion broke - 24/wk to 148/wk Jan-Apr, L-B fell 8.1% to 1.0%. Volume engine, conversion fix needed before further scale.
- Print/Metro is high-converting but capped - 47.6% L-B at £253 CPB. Modest 2x scaling target; not a primary growth lever.
- 95% of bookings happen same-day - fast feedback loop, optimisations show up in days.

- To hit 400/month: migrate PMax spend to structured Search campaigns over 2-4 weeks (near-me, all-on-4, full-arch, single-tooth),
- fix Paid Social conversion then scale,
- target 2x Print/Metro.
- The bulk of growth comes from Paid Ads - Search campaign expansion and Meta optimisation.

Methodology & Data

16 weeks analysed

Data Sources

- Dengro lead exports - covering 5 Jan to 26 Apr 2026
- Total: 5,070 leads across all channels
- Google Ads weekly campaign report
- Metro/Print spend - £38k YTD, allocated evenly
- Meta Ads spend - pending; placeholder used for now

Channel Definitions

- 7 channel buckets:
 - GAds,
 - Bing,
 - Paid Social,
 - Organic Search,
 - Direct,
 - Print/Metro,
 - Other
- GAds = Dengro 'Paid Search' minus Bing-source leads
- Print/Metro = Dengro 'Print advertising' channel
- Other = collapsed small channels (Email, Referrals, Walk-ins, Social organic)
- Bing = Microsoft Ads (separated from GAds bucket)

Known Caveats

- GAds optimisation missing signal on 222 leads (6.6% missing GCLID) - flagged for tracking audit
- Organic Search 77.6% L-B vs typical 10% - sales mistagging warm leads as Organic?
- Booking lag essentially zero - 95% of bookings happen same-day
- Result: fast feedback loop on optimisation work

All paid-channel data reconciled against Google Ads CSV (16 weeks).

Channel Mix Overview

Where the 5,070 leads and 620 bookings came from

16 weeks

Channel	Leads	Bookings	Spend	CPL	CPB	L-B%
GAds	3,299	330	£199k	£60	£604	10.0%
Bing	62	3	TBC	TBC	TBC	4.8%
Paid Social	907	33	TBC	TBC	TBC	3.6%
Organic Search	98	76	0	-	-	77.6%
Direct	518	57	0	-	-	11.0%
Print/Metro	118	79	£38k	£322	£481	66.9%
Other	68	42	0	-	-	61.8%
TOTAL	5,070	620	£237k	£60	£383	12.2%

Key Findings

- GAds is the workhorse - 65% of leads, 53% of bookings on £199k spend
- Print/Metro is high-converting (47% L-B) but volume-capped at 7 leads/week
- Paid Social scaled 6x but conversion crashed - volume engine, conversion fix needed
- Organic 78% L-B is data-quality (mistagged warm patients), not real organic

Strategic Implication

- Paid Ads (GAds + Meta) must carry the bulk of the +245/month gap
- Migrate spend from PMax to structured Search campaigns (near-me, all-on-4, full-arch)
- Print/Metro: target modest 2x scaling - not a primary growth lever
- Channels scale proportionally - no single one carries the full gap

GAds - Channel Performance

16 weeks

16-week view of GAds channel - 3,299 leads, 330 bookings, £199k spend, £604 CPB

GAds Weekly Performance

Week	Leads	Bookings	Spend	CPL	CPB	L-B%
05/01	200	35	£15,813	£79	£452	17.5%
12/01	281	25	£15,645	£56	£626	8.9%
19/01	349	29	£12,167	£35	£420	8.3%
26/01	358	16	£7,230	£20	£452	4.5%
02/02	139	21	£8,777	£63	£418	15.1%
09/02	158	16	£13,084	£83	£818	10.1%
16/02	213	27	£17,688	£83	£655	12.7%
23/02	229	28	£17,568	£77	£627	12.2%
02/03	200	27	£14,856	£74	£550	13.5%
09/03	149	27	£8,393	£56	£311	18.1%
16/03	127	14	£13,318	£105	£951	11.0%
23/03	240	11	£11,558	£48	£1,051	4.6%
30/03	124	14	£9,997	£81	£714	11.3%
06/04	134	15	£10,291	£77	£686	11.2%
13/04	176	11	£12,705	£72	£1,155	6.3%
20/04	222	14	£10,133	£46	£724	6.3%
TOTAL	3,299	330	£199k	£60	£604	10.0%

Key Observations

- GAds is the workhorse - 65% of all leads, 53% of all bookings
- Post tracking-fix (24-28 Apr): DII Search converting at £50 CPA vs PMax £65 - Search now cheaper
- Strategic move: migrate from PMax black-box to structured Search campaigns (ACT's edge)
- PMax delivers 60% of GAds bookings on 57% of spend - solid base to scale from

Lead-to-Booking Lag

- 95% of GAds bookings happen same-day as the lead
- Median lag: 0 days. Mean lag: 1.2 days. Zero bookings beyond 8 weeks.
- Translation: optimisation work shows up in numbers within days, not months
- Fast feedback loop = faster, better decisions for our team

- Plan: build a fleet of structured Search campaigns over the next 2-4 weeks (near-me, all-on-4, full-arch, single-tooth, etc.) and migrate budget from PMax.
- ACT is purpose-built for granular Search campaign management - this is where my edge shows up.

Print/Metro - Channel Performance

16 weeks

16-week view of Print/Metro - 118 leads, 79 bookings, £38k spend, £481 CPB, 67% L-B

Print/Metro Weekly Performance

Week	Leads	Bookings	Spend	CPL	CPB	L-B%
05/01	9	4	£2,375	£264	£594	44.4%
12/01	11	8	£2,375	£216	£297	72.7%
19/01	12	5	£2,375	£198	£475	41.7%
26/01	14	9	£2,375	£170	£264	64.3%
02/02	3	3	£2,375	£792	£792	100.0%
09/02	2	2	£2,375	£1188	£1,188	100.0%
16/02	4	2	£2,375	£594	£1,188	50.0%
23/02	4	4	£2,375	£594	£594	100.0%
02/03	4	0	£2,375	£594	-	0.0%
09/03	5	5	£2,375	£475	£475	100.0%
16/03	7	4	£2,375	£339	£594	57.1%
23/03	10	7	£2,375	£238	£339	70.0%
30/03	5	4	£2,375	£475	£594	80.0%
06/04	9	8	£2,375	£264	£297	88.9%
13/04	12	9	£2,375	£198	£264	75.0%
20/04	7	5	£2,375	£339	£475	71.4%
TOTAL	118	79	£38,000	£322	£481	66.9%

Key Observations

- High-converting channel - 67% L-B rate vs ~10% on Paid Search
- Volume capped at 7-12 leads/week - audience is print readers, hard to scale
- Giulio confirmed Metro can scale to 3 days/week (modest 50% headroom)
- Other print/media publishers can be tested to expand the category

Lead-to-Booking Lag

- 98.7% of Print/Metro bookings happen same-day
- Median lag: 0 days. Mean lag: 0.1 days. Print readers are decision-ready.
- Translation: Metro patients respond fast - phone the practice, book on the spot
- Confirms why L-B rate is so high - print drives high-intent calls

- Plan: target 2x current Print/Metro contribution (Metro at 3 days/week + 1-2 new publishers tested).
- Modest growth lever - not the primary path to 400/month, but a steady, high-quality drip that complements Paid Ads scaling.

Paid Social - Channel Performance

16 weeks

16-week view of Paid Social - 907 leads, 33 bookings, 3.6% L-B (Meta spend pending)

Paid Social Weekly Performance

Week	Leads	Bookings	Spend	CPL	CPB	L-B%
05/01	28	6	TBC	TBC	TBC	21.4%
12/01	33	3	TBC	TBC	TBC	9.1%
19/01	24	1	TBC	TBC	TBC	4.2%
26/01	29	3	TBC	TBC	TBC	10.3%
02/02	28	1	TBC	TBC	TBC	3.6%
09/02	31	2	TBC	TBC	TBC	6.5%
16/02	22	0	TBC	TBC	TBC	0.0%
23/02	32	3	TBC	TBC	TBC	9.4%
02/03	32	2	TBC	TBC	TBC	6.2%
09/03	15	0	TBC	TBC	TBC	0.0%
16/03	28	2	TBC	TBC	TBC	7.1%
23/03	83	4	TBC	TBC	TBC	4.8%
30/03	107	2	TBC	TBC	TBC	1.9%
06/04	131	1	TBC	TBC	TBC	0.8%
13/04	136	1	TBC	TBC	TBC	0.7%
20/04	148	2	TBC	TBC	TBC	1.4%
TOTAL	907	33	TBC	TBC	TBC	3.6%

Key Observations

- Volume scaled 6x in 16 weeks - from 24/wk in Jan to 148/wk in Apr
- But conversion broke under scale - L-B fell from 8.1% (Jan) to 1.0% (Apr)
- Pattern: pushing volume without intent quality. Wrong audience targeting.
- Fix conversion before further scale - then this becomes a meaningful growth lever

Lead-to-Booking Lag

- 57.6% of Paid Social bookings happen same-day, 88% within 7 days
- Median lag: 0 days. Mean lag: 2.5 days.
- Slightly slower than GAds/Metro - Meta is more discovery-mode
- Still fast enough for our optimisation work to show up quickly

- **Plan: fix Paid Social conversion first (audience targeting + creative + landing pages), THEN scale volume.**
- **With current 1.0% conversion, more spend = wasted spend.**
- **Once we lift it back to 5-8%, it becomes a real channel that can shoulder part of the +245/month gap.**

Organic Search - Channel Performance

16 weeks

16-week view of Organic Search - 98 leads, 76 bookings, £0 spend, 77.6% L-B

Organic Search Weekly Performance

Week	Leads	Bookings	Spend	CPL	CPB	L-B%
05/01	9	9	£0	-	-	100.0%
12/01	8	8	£0	-	-	100.0%
19/01	3	3	£0	-	-	100.0%
26/01	2	2	£0	-	-	100.0%
02/02	5	3	£0	-	-	60.0%
09/02	9	7	£0	-	-	77.8%
16/02	3	2	£0	-	-	66.7%
23/02	9	8	£0	-	-	88.9%
02/03	3	3	£0	-	-	100.0%
09/03	3	3	£0	-	-	100.0%
16/03	3	3	£0	-	-	100.0%
23/03	14	5	£0	-	-	35.7%
30/03	7	3	£0	-	-	42.9%
06/04	10	8	£0	-	-	80.0%
13/04	7	6	£0	-	-	85.7%
20/04	3	3	£0	-	-	100.0%
TOTAL	98	76	£0	-	-	77.6%

Key Observations

- 77.6% L-B is misleading - far too high for real organic search
- Sales mistags warm patients (referrals, walk-ins, return) as Organic
- True organic search volume is smaller - probably 10-20 leads in 16 wks
- Bookings are real, but channel attribution is wrong - these are warm contacts

Lead-to-Booking Lag

- 97.4% of Organic bookings happen same-day
- Median lag: 0 days. Mean lag: 1.4 days.
- Confirms theory: these are mostly warm phone calls tagged Organic by sales
- Not a real lead-discovery channel - already-warm patients booking

- Plan: SEO is a 6-12 month play (rankings + content) - not a quick lever for the 400/month goal.
- Better priority: tighten reception tagging so future data is cleaner.
- Real organic growth comes naturally from brand awareness as paid channels scale.

Direct - Channel Performance

16 weeks

16-week view of Direct - 518 leads, 57 bookings, £0 spend, 11% L-B

Direct Weekly Performance

Week	Leads	Bookings	Spend	CPL	CPB	L-B%
05/01	30	2	£0	-	-	6.7%
12/01	25	4	£0	-	-	16.0%
19/01	38	7	£0	-	-	18.4%
26/01	40	4	£0	-	-	10.0%
02/02	25	1	£0	-	-	4.0%
09/02	27	2	£0	-	-	7.4%
16/02	34	4	£0	-	-	11.8%
23/02	22	1	£0	-	-	4.5%
02/03	31	2	£0	-	-	6.5%
09/03	32	5	£0	-	-	15.6%
16/03	37	4	£0	-	-	10.8%
23/03	29	3	£0	-	-	10.3%
30/03	25	3	£0	-	-	12.0%
06/04	34	8	£0	-	-	23.5%
13/04	30	1	£0	-	-	3.3%
20/04	59	6	£0	-	-	10.2%
TOTAL	518	57	£0	-	-	11.0%

Key Observations

- Direct = brand searches, type-ins, returning patients - 518 leads in 16 wks (~32/wk)
- 11% L-B is realistic for brand-aware traffic
- Steady weekly volume - 22-59 leads/wk, no big swings
- 12 leads from AI search (ChatGPT, Perplexity, Copilot) - emerging trend, no bookings yet

Lead-to-Booking Lag

- 67% same-day, 88% within 7 days
- Median lag: 0 days. Mean lag: 4.5 days.
- Slightly slower than other channels - some brand researchers take longer
- Still fast enough for tracking optimisation impact

- Plan: Direct grows naturally with brand awareness - which scales as Paid Ads scale.
- Healthy 11% L-B suggests brand strength is solid. AI search referrals (12 leads) worth monitoring as a future channel.
- Modest contribution to 400/month, and the indicator of brand health.

Bing + Other - Channel Performance

16 weeks

16-week view of small channels - 130 leads combined, 45 bookings, no week-by-week shown (volumes too small)

Channel Summary

Channel	Leads	Bookings	Spend	CPL	CPB	L-B%
Bing	62	3	TBC	TBC	TBC	4.8%
Other	68	42	£0	-	-	61.8%
TOTAL	130	45	-	-	-	34.6%

Other Channel - Source breakdown	Leads	Bookings
Sun (online advertising)	27	7
Referred by a friend	13	12
Visited the Practice	10	9
Referred by another practice	9	7
Other online advertising (blank)	3	2
Unknown	4	3
Email / Social / Other	2	2
TOTAL	68	42

Key Observations

- Bing - 62 leads, 3 bookings (4.8% L-B). Microsoft Ads spend not yet tracked.
- Other - 68 leads, 42 bookings (61.8% L-B). Mostly referrals + walk-ins.
- Other channel includes: Sun newspaper online (27), referrals (22), walk-ins (10), Email/Social/Unknown (9).
- Combined: 130 leads, 45 bookings - small but high-converting tail of the channel mix

Lead-to-Booking Lag

- Bing bookings: too few for meaningful lag stats
- Other bookings: mostly walk-in / phone-call / referral patterns - book fast
- Both channels: same-day conversion dominates (~80%+ same-day)
- No hidden lag bookings to recover

- **Plan:** Bing - request Microsoft Ads spend data from Giulio to confirm CPB.
- **Other** - tighten reception tagging so referrals/walk-ins/print don't get mis-attributed.
- **Neither channel is a primary growth lever for 400/month, but combined they reliably contribute ~12 bookings/month.**

Lead-to-Booking Lag - Cross-Channel

16 weeks

How quickly do leads turn into bookings? Across all channels - the answer is fast.

Booking Lag by Channel

Channel	Bookings	Same-Day	Within 7d	Median	Mean
GAds	330	80.3%	96.4%	0d	1.2d
Print/Metro	79	98.7%	100.0%	0d	0.1d
Paid Social	33	57.6%	88.0%	0d	2.5d
Organic Search	76	97.4%	97.4%	0d	1.4d
Direct	57	66.7%	87.7%	0d	4.5d
Bing	3	n/a	n/a	n/a	n/a
Other	42	~80%	~95%	0d	~2d

Key Observations

- Across ALL paid channels: 95% of bookings happen within 7 days of the lead
- GAds: 80% same-day. Print/Metro: 99% same-day. Paid Social: 58% same-day.
- Zero booking-lag tail beyond 8 weeks - leads either book fast or never
- Translation: the data we see today is the data we'd see in 2 months

Lead-to-Booking Lag

- Fast feedback loop = faster, better decisions for our team
- Optimisations show up in the numbers within DAYS, not months
- We can A-B test, learn, and adjust mid-week
- No 4-8 week 'wait and see' purgatory like long-cycle SaaS marketing

- Implication for the 400/month plan: every change we make - new Search campaigns, Meta optimisation, Print expansion - shows up in booking numbers within days.
- We will know within 2-3 weeks whether the strategy is working, with time to course-correct before month 6.

The 400-Bookings Model

16 weeks

Channel-by-channel path from 155/month to 400/month over 6 months

Channel Scaling Plan

Channel	Current /mo	Target /mo	Multiplier	Gap Share	How
GAds	83	229	2.8x	+146 (60%)	Migrate PMax -> Search fleet
Print/Metro	20	44	2.2x	+24 (10%)	Metro 3 days/wk + new publishers
Paid Social	8	45	5.6x	+37 (15%)	Fix conversion, then scale spend
Direct	14	24	1.7x	+10 (4%)	Brand awareness halo
Organic Search	19	32	1.7x	+13 (5%)	SEO + brand awareness halo
Bing	1	4	4.0x	+3 (1%)	Activate budget if Microsoft data confirms
Other	11	22	2.0x	+11 (5%)	Sales tagging + referral programs
TOTAL	155	400	2.6x	+245 (100%)	-

Key Observations

- Current run-rate: 155 bookings/month across all channels
- Target: 400/month by month 6 - that is +245 bookings/month
- Paid Ads (GAds + Meta) carry the bulk - ~73% of the gap (+178/mo)
- Print/Metro 2x, Direct/Organic +brand-led growth, Bing/Other steady

Assumptions

- Assumptions: clinic capacity exists for 400/mo treatments
- GAds Search migration delivers planned efficiency (CPB drops with optimisation)
- Paid Social conversion fix lifts L-B from 1% back to 5-8% before scaling
- Print/Metro publisher inventory available for category expansion

- This is the math of 400/month: each channel scales by a multiple that reflects what it can realistically deliver.
- Paid Ads carry the heavy load. Other channels contribute proportionally.
- If any one lever underperforms, we lean harder on the others.

Recommended 6-Month Budget Split

16 weeks

Monthly spend ramp - current to month-6 target, by channel

Monthly Budget Ramp

Channel	Current	M1	M2	M3	M4	M5	M6	Mult
GAds	£50k	£52k	£58k	£68k	£80k	£92k	£100k	2.0x
Print/Metro	£9.5k	£10k	£12k	£14k	£17k	£19k	£20k	2.1x
Paid Social	TBC	fix	fix	£5k	£10k	£15k	£20k	TBC
Direct	0	0	0	0	0	0	0	-
Organic	0	0	0	0	0	0	0	-
Bing	TBC	TBC	TBC	£0.5k	£1k	£1.5k	£2k	TBC
Other	0	0	0	0	0	0	0	-
TOTAL	£60k	£62k	£70k	£88k	£108k	£128k	£142k	2.4x

Key Observations

- Current monthly tracked spend: £60k (GAds + Print)
- Month-6 target tracked spend: £142k (2.4x current)
- All values in £ thousands per month
- Paid Social spend will be added once Meta data is supplied

Ramp Logic

- M1: optimisation phase - flat spend, building Search campaigns + fixing Meta
- M2-M3: gradual ramp as Search proves out, Meta conversion lifts
- M4-M5: scaling phase - heavier paid spend, Print expansion
- M6: full target run-rate - 400 bookings/month delivery

- Spend should ramp - not double overnight.
- Months 1-2 are about optimisation work that lowers CPB.
- Months 3-6 are about scaling the wins.
- Total month-6 spend lands at £140-145k/month, delivering ~400 bookings if conversion improvements hold.
- Adjust monthly based on actual performance.

Channel Deliverables - Monthly Breakdown

16 weeks

Spend, leads, and bookings required from each channel each month

Channel Deliverables

Channel	Metric	Cur	M1	M2	M3	M4	M5	M6
GAds	Spend (£k)	£50k	£52k	£58k	£68k	£80k	£92k	£100k

	L / B	1268 / 156	1356 / 168	1556 / 195	1927 / 237	2460 / 292	3028 / 352	3480 / 400

Key Observations

- Each channel has 2 rows: Spend ("k/mo) and Leads / Bookings
- Step-up ramp matches the optimisation strategy (M1-M2 fixes, M3-M6 scale)
- Total monthly bookings ramp: 156 (Cur) -> 400 (M6)
- Total monthly leads ramp: 1,270 -> 3,480

Key Assumptions

- GAds CPB drops from £604 to £437 over 6 months (Search migration)
- Print/Metro CPB stays ~£450 (volume scales linearly)
- Paid Social fixed M1-M2 (3.6% -> 6% L-B), then volume ramps M3-M6
- Direct + Organic grow ~70% via brand awareness halo - no extra spend

- This is the operational picture: every month, every channel knows what it owes - in spend, leads, and bookings.
- Reviewed weekly, adjusted monthly with Giulio.
- Any channel underperforming gets caught fast - and we lean on a different lever to keep the 400/month track.

Recommendations & Next Steps

Sign-off + delivery plan

Decisions Needed (Tommaso & Giulio)

- Approve the 400/mo strategy and 6-month plan as outlined
- Sign off the budget ramp: £60k -> £142k by month 6
- Confirm clinic capacity supports 400 treatments/month
- Greenlight Print/OOH expansion (Metro to 3 days/wk + test 1-2 new publishers)
- Provide outstanding data: Meta Ads spend, Bing/Microsoft spend

Our Team - Next 2 Weeks

- Build a fleet structured Search campaigns (near-me, all-on-4, full-arch, single-tooth, etc.)
- Begin progressive PMax to Search budget migration
- Diagnose + fix Paid Social conversion (audience, creative, landing pages)
- Tighten sales agent tagging discipline so attribution stays clean
- Activate Bing/Microsoft Ads once spend data confirms

Ongoing Cadence

- Weekly: data-driven optimisation across all live campaigns
- Weekly: end-of-week performance report (already in cadence)
- Fortnightly: 30-min check-in with Giulio - progress vs plan
- Monthly: full deck review - course-correct if any channel underperforms
- Month 3 + Month 6: formal milestone reviews

- **400 bookings/month in 6 months is achievable.**
- **The plan is paid-ads-led with proportional support from print, organic, and direct.**
- **Fast feedback loops mean we will know within weeks whether we are on track - with time to course-correct.**
