Data: 5 Jan - 26 Apr 2026 | 16 weeks analysed | Paid Search
excl Bing

The headline finding

5.5x

Higher booking rate when leads are called within 15 minutes vs waiting 12+ hours.

Callback speed is the single biggest lever on conversion.

28.2%

Book rate when called
within 15 min

5.1%

Book rate when waiting
12+ hours

57%

Of GAds spend buys
leads in dead zones

Projected impact

+25-40%

More bookings on the same monthly spend by shifting GAds to in-hours and adopting an SDR + Closer split.

15-minute call response delivers 5.5x the bookings of a 12+h wait

Paid Search excl Bing | Jan 5 – Apr 26 2026 | 16 weeks | 3,297 leads

Bucket	Leads	% of total	Booked	Book %
0-15m	393	11.9%	111	28.2%
15-30m	176	5.3%	37	21.0%
30-60m	162	4.9%	28	17.3%
1-3h	227	6.9%	33	14.5%
3-6h	200	6.1%	18	9.0%
6-12h	268	8.1%	10	3.7%
12+h	1,864	56.5%	95	5.1%
Never	7	0.2%	0	0.0%
TOTAL	3,297	100%	332	10.1%

The gold standard

Leads called within 15 minutes book at 28.2% — that is the conversion ceiling.

The reality

Only 11.9% of leads currently get the gold-standard treatment.

The lost majority

56.5% of leads wait 12+ hours and book at just 5.1% — a 5.5x conversion gap.

Booking rate tracks team capacity — when 1 agent is overloaded, conversion collapses

Paid Search excl Bing | week-by-week | 16 weeks | 3,297 leads

week	leads	% 0-30m	% 30m-3h	% 3h+	book %	Active agents	Notes
Jan 5	200	15.5%	8.0%	76.5%	17.5%	feria(17), patrycja(13), livi(3), tommaso(2)	4 agents → highest book of period
Jan 12	281	20.6%	17.8%	61.6%	8.9%	feria(18), patrycja(7)	Decent speed but only 2 agents on heavy volume
Jan 19	349	9.5%	18.1%	72.5%	8.3%	patrycja(20), feria(4), livi(2)	High volume + slow speed → book drops
Jan 26	358	4.7%	3.1%	92.2%	4.5%	patrycja(6), feria(4), livi(1)	92% in 3h+ — full overload
Feb 2	139	15.8%	12.9%	71.2%	15.1%	feria(19), patrycja(2)	Low volume — feria carries it solo
Feb 9	158	26.6%	10.1%	63.3%	10.1%	feria(11), patrycja(5)	Fast speed, 2 agents — mid book
Feb 16	213	19.7%	15.0%	65.3%	12.7%	feria(20), patrycja(4), angelica(2), livi(1)	4 agents active — book holds
Feb 23	229	39.3%	12.7%	48.0%	12.2%	feria(18), angelica(7), patrycja(3)	Best speed of any week (39% in 0-30m)
Mar 2	200	14.0%	8.0%	78.0%	13.5%	feria(13), patrycja(13), livi(1)	Slow speed but 2 senior agents kept book up
Mar 9	149	25.5%	12.8%	61.7%	18.1%	feria(18), patrycja(7), livi(2)	Best book % — 3 agents + manageable volume
Mar 16	127	25.2%	15.0%	59.8%	11.0%	feria(14)	feria solo but low volume = manageable
Mar 23	240	10.0%	12.1%	77.9%	4.6%	feria(11)	feria alone vs 240 leads → bottleneck proven
Mar 30	124	19.4%	12.9%	67.7%	11.3%	feria(12), livi(1), patrycja(1)	Low volume + 3 agents → book holds
Apr 6	134	18.7%	15.7%	65.7%	11.2%	feria(13), patrycja(1), livi(1)	Last "normal" week — low volume + 3 agents
Apr 13	176	11.4%	5.7%	83.0%	6.8%	feria(11), birsu(1)	birsu starts, 83% slip to 3h+
Apr 20	220	19.5%	10.9%	69.5%	6.8%	feria(7), birsu(5), livi(2), patrycja(1)	birsu takes 33% of bookings, book stays low

Single-agent weeks crash

Mar 23: feria alone vs 240 leads → 4.6% book

2+ agents holds book rate

Mar 2, Mar 9, Feb 16 all 13-18% book even with slower speed

April reset

birsu ramping but team output not lifting → training / handover gap

Outbound calling load doubled in 6 weeks — team did not grow

Last 7 weeks | GAds (Paid Search excl Bing) + Paid Social — both need outbound calls

week	GAds leads	GAds book %	Paid Social leads	Social book %	Outbound queue	Active agents
Mar 9	149	18.1%	15	0.0%	164	3
Mar 16	127	11.0%	28	7.1%	155	1
Mar 23	240	4.6%	83	4.8%	323	1
Mar 30	124	11.3%	107	1.9%	231	3
Apr 6	134	11.2%	131	0.8%	265	3
Apr 13	176	6.8%	136	0.7%	312	2 (birsu new)
Apr 20	220	6.8%	148	1.4%	368	4 (birsu ramp)

Paid Social scaled 6x

From ~25/wk in Jan-Mar to 148/wk by Apr 20

Outbound queue +125%

~165/wk in early Mar → 368/wk by Apr 20 (2.2x in 6 weeks)

Same 1-4 agents

Owning all of it: outbound calls + inbound Metro + closing

When leads land matters as much as how fast they are called

Paid Search excl Bing | 16 weeks | 3,297 leads

Bucket	Leads	% of total	Booked	Book %	% 0-30m	Avg time
Mon-Fri 00-08	325	9.9%	21	6.5%	0.0%	16h 24m
Mon-Fri 08-12	474	14.4%	73	15.4%	27.2%	9h 18m
Mon-Fri 12-14	287	8.7%	53	18.5%	40.8%	9h 24m
Mon-Fri 14-18	655	19.9%	98	15.0%	40.2%	10h 42m
Mon-Fri 18-20	269	8.2%	19	7.1%	7.4%	20h 06m
Mon-Fri 20-24	488	14.8%	26	5.3%	0.0%	20h 42m
Weekend	799	24.2%	42	5.3%	5.0%	27h 42m

3 factors driving the recent collapse

1. When leads land

We control this via GAds ad scheduling

2. How fast leads are called

Team capacity + structure (SDR role)

3. Agent capacity vs lead volume

Team structure (SDR + Closer split)

Working hours leads book at 15-18%. Out-of-hours leads book at 5-7%.

57% of all GAds spend currently buys leads landing in dead zones (eve, night, weekend).

Quick win — concentrate GAds spend in Mon-Fri 8am-6pm

Phase 1 — fully within our control, deploy this week, no team changes needed

Time bucket	Today	Proposed	Book %
Mon-Fri 00-08	9.9%	minimal	6.5%
Mon-Fri 08-12	14.4%	maintain	15.4%
Mon-Fri 12-14	8.7%	maintain	18.5%
Mon-Fri 14-18	19.9%	maintain	15.0%
Mon-Fri 18-20	8.2%	reduce	7.1%
Mon-Fri 20-24	14.8%	minimal	5.3%
Weekend	24.2%	minimal	5.3%

Result of shift

57% of spend in dead zones → ~10%. ~85% of spend lands in the 15-18% book-rate window.

Expected outcome

+25-40% more bookings on the same monthly spend. 2-4 week feedback loop.

What we will do (this week)

- Heavily reduce GAds bids/budget outside Mon-Fri 08-18
- Concentrate spend in the proven 15.8% book window
- Outside that window: minimal (brand-defence only) or pause

Why

- 57% of GAds spend buys leads in dead zones → 5.7% book
- Mon-Fri 08-18 leads book at 15.8% — nearly 3x better
- Fully within our control — no team or process changes needed

Owner & next step

Chris (Google Ads). Deploy this week, monitor weekly.

The structural fix — split sales into Lead Hunter (SDR) + Closer

Phase 2 — implement once Phase 1 data confirms the in-hours capacity ceiling

SDR — Lead Hunter

1 dedicated role

- Sole job: dial new leads within 15 minutes
- Qualifies — fit, treatment, timeline, finance
- Captures basics + warm-transfers live to Closer
- Does NOT close the booking

Warm transfer (live)

SDR briefs Closer in real time while lead is on the phone — Closer starts mid-conversation.

Closer

Senior agents (e.g. feria, patrycja)

- Takes warm handoffs — already qualified
- Owns the booking and the close
- Also works booked-back appointments
- Does NOT dial cold leads

Why this works (and why warm transfer beats callback)

- Speed-to-lead is the highest-leverage variable but does not require closer skill — split the work to match the strengths
- Lead is already on the phone — no risk of missing the second call. Closer starts primed, not from scratch
- Industry data: warm transfers convert 2-3x higher than scheduled callbacks. Standard practice in insurance, mortgage, dental, aesthetics

Phasing

Phase 1 (Slide 6) deploys this week. The capacity ceiling it surfaces is the trigger for Phase 2.

Decision needed (Tommaso / Giulio)

In-principle agreement to consider the split if Phase 1 data confirms the capacity ceiling.
