Executive Summary

Week 1 · 13-17 Apr

£8,462	87	101	£97
Week 1 Spend	Dengro Offline Leads	Primary Conversions	Cost per Lead

Key Wins This Week

- Brand CPC at 8-week low: £2.16 vs March avg £3.29 (−35%). £1.50 Max CPC cap is biting without suppressing volume.
- PMax CPA improved week-on-week: £73 vs £85.86 prior week, despite persistent asset-group policy restrictions.
- DII entered learning phase after full rebuild: 25 new ad groups, ~675 keywords, 75 RSAs. Clean read expected Week 2-3.
- 5,000+ structured negatives replaced 2,192 unstructured broad-match entries across 11 shared lists.
- Giulio replied Fri 17 Apr with answers — compliance actions captured and scheduled for Week 2.

Week 1 was structural.
Three live campaigns moved off Max Conversion Value bidding onto controllable targets.
Early signal is positive — but DII needs a further week of stabilisation and Monday's end-to-end tracking audit is the gate to any CPA-based decisions from here.

Work Delivered

Foundation Week

Tue 14 → Fri 17 April · 4 working days post-signing · 28 hours

Day-by-Day Activity

Day	Focus	Output	Impact
Tue 14 Apr	Negatives Overhaul	2,192 → ~4,000+ across 11 lists	~£63k waste blocked
Wed 15 Apr	Account-Wide Reset	Brand · PMax tCPA £60 · DII tCPA £75	Controllable bid targets
Thu 16 Apr	DII Rebuild (Part 1)	20 AGs · 537 keywords · 60 RSAs	Patient-intent structure
Fri 17 Apr	Audit + Completion	173 DBD-blockers removed · AG21-25 built	Campaign 25/25 complete

Key Findings

- All 3 live campaigns moved from Max Conversion Value to Target CPA / Target Impression Share.
- Auto-apply recommendations disabled = no more silent keyword removals.
- Zero NHS/free-seeker junk in PMax search terms post-switch - negatives are working.
- Asset groups in PMax flagged 'limited by policy' - full rebuild scheduled Wed 22 Apr.

Running Totals

- Positive keywords added: 675 across 25 ad groups
- New RSAs written: 75 (1,050 headlines, 280 descriptions)
- Negatives: 5,000 structured across 11 shared lists
- Geo targets: 270 London postcodes rolled out to all 3 active campaigns

Brand Campaign

Performance

CPC at 8-week low · £1.50 Max CPC cap is working

Week 1 Performance

Metric	Week 1	Prior Week	Change
Week spend	£280	£298	−6%
Primary conv	12.0	12.0	Flat
Cost / conv	£23.39	£24.89	−6%

Bid Strategy Applied

- From: Max Conversion Value (tROAS 10%) - inflating brand CPCs To: Target Impression Share 90% · Max CPC £1.50
- Goal: eliminate runaway bidding on brand traffic, lock in the brand position at controlled cost
- Result: CPC dropped from £3.18 (prior 30d) to £1.61 (first 36 hours) to £2.16 (week avg)

Key Finding

- Brand CPC is at its lowest of 8 tracked weeks: £2.16 vs March avg £3.29 (−35%).
- The £1.50 Max CPC cap (set Wed 15 Apr) is biting without suppressing volume.
- Impression share held at 92%+ and conversion volume tracked with spend.
- This is the strongest signal of Week 1.

Next Week

- Hold the £1.50 cap through Week 2. Let the bid strategy complete its 14-day learning phase.
- Evaluate lowering toward £1.20 once CPC has stabilised at or below £1.50.
- Brand is mature territory, small incremental CPC reductions compound into meaningful monthly savings.

Performance Max

CPA improved week-on-week despite policy restrictions

Week 1 Daily CPA

Day	Spend	Primary Conv	CPA
Mon 13 Apr	£2,017	17	£119
Tue 14 Apr	£558	10	£56
Wed 15 Apr	£402	16	£25
Thu 16 Apr	£1,792	23.5	£76
Fri 17 Apr	£1,188	15	£79

What Changed & What's Next

Bid Strategy Switch

From: Max Conversion Value (tROAS 80%)
To: Target CPA £60
Drove campaign to optimise for LEAD VOLUME at controllable cost, not arbitrary £300 booking values
Wed 15 Apr: first full day under new strategy delivered £25 CPA — best single day in the account

Flagged for Week 2

Google still reports 'most asset groups limited by policy'
This restricts PMax reach — it's not running at full potential
Full asset rebuild scheduled Wed 22 April
Stripping unverified claims: '99.12% success', 'Save 60%', 'Top 10 Europe'
Replacing with policy-safe copy aligned to Giulio's verified claims

Recommendation

Hold the new bid strategy untouched — let Google complete its 7-day learning cycle.
PMax asset rebuild addresses the policy flag next week.
Expected upside: lifting policy limits typically unlocks 2-3× reach at the same CPA.

Dental Implants Intent

Rebuild

Fully rebuilt Thu–Fri · 4 ad groups → 25 · entered learning phase

Metric	Before (legacy)	After (new)	Change	Impact	Status
Ad groups	4 (paused)	25 live	+525%	Patient-intent grouped	Complete
Keywords	27	~675	+2,400%	Phrase + exact	Complete
RSAs	6 (Poor-rated)	75	+1,150%	Keyword-aligned	Complete
Headlines	~90	1,050	+1,067%	Unique, keyword-rich	Complete
Descriptions	~24	280	+1,067%	75-86 chars (QS safe)	Complete
Legacy AG CPA	£99+ avg	Paused	Eliminated	Waste removed	Done
Bid strategy	Max Conv Value (tROAS)	Target CPA £75	Controllable	Lead-focused	Learning
Geo	25-mile radius	270 London postcodes	M25 targeting	4-tier structure	Rolled out
Schedule	Always on	42-cell structure	Hourly analysis	Reporting ready	Live
Learning phase	n/a	Day 1 of 14	In progress	7-14 days to stabilise	Monitor
Campaign status	Scaling with waste	Learning - clean base	Foundation set	Week 2-3 read	On track

Key Finding

- The DII campaign was fully restructured mid-week (Tue → Fri).
- Week 1 CPA blends 1 day of the old structure with 4 days of Google's learning phase, expected noise, not signal.
- Google requires 14-21 days to rebalance bids against the new structure.
- First clean performance read: Week 2-3.

Recommendation

- Hold the new structure untouched through Wed 22 April.
- Ad Strength audit on AG22-25 resumes Tuesday once Google clears the new ads from Pending review.
- Second pass on AG1-21 to push remaining RSAs toward Excellent.

The Numbers That Matter

Business Outcomes

Business outcomes — what the account delivered this week

Week 1 at a Glance

Metric	Week 1	Prior Week	Change	Status
Total Spend	£8,462	£10,291	−18%	Trimmed
Dengro Offline Leads	87	—	—	Tracking
Primary Conversions	101	134	−25%	Learning

Key Signal

- 87 Dengro Offline Leads generated this week across 3 active campaigns.
- Performance Max delivered 90% of qualified leads (78.5 of 87).
- Dengro Offline Booking fired 0 times, tracking gap flagged for Monday's audit.
- No CPA-based decisions will be drawn before the audit closes.

Week 1 Conversion Breakdown

Campaign	Spend	Primary	Dengro Leads	Cost/Lead
Performance Max	£5,960	81.5	78.5	£75.92
Dental Implants Intent	£2,222	7.5	6.5	£341.83
Brand	£280	12.0	2.0	£140.24
TOTAL	£8,462	101.0	87.0	£97.27
[molar replacement cost]	3	£159	£40	Below average

Dengro Offline Booking fired 0 times in Week 1. Monday's tracking audit will confirm whether this is a reporting gap or a genuine zero-booking week.

8-Week Context

8-Week Trend

Weekly performance trend · 23 Feb – 17 April 2026 · spend, conversions, CPA

Weekly Performance

Week	Spend	Primary Conv	CPA
23 Feb	£17,568	237.5	£74
2 Mar	£14,856	189.6	£78
9 Mar	£8,393	120.3	£70
16 Mar	£13,318	137.7	£97
23 Mar	£11,558	239.2	£48
30 Mar	£9,997	148.4	£67
6 Apr	£10,291	134.1	£77
13 Apr	£8,462	101	£84
30 Mar	£9,997	148.4	£67
6 Apr	£10,291	134.1	£77
13 Apr	£8,462	101	£84

Key Observation

- Weekly spend fluctuated dramatically: £17.5k peak (23 Feb) → £8.4k (Week 1). A 52% range in 8 weeks.
- CPA swung from £48 (best week) to £97 (worst week) — highly volatile before our engagement.
- Additional weeks: 30 Mar £9,997/£67 CPA · 6 Apr £10,291/£77 CPA · 13 Apr £8,462/£84 CPA
- Week 1 (13 Apr) reflects 5 days of structural disruption: new bid strategies, rebuilt campaigns, changing keyword base.

Week 1 in Context

- Weekly spend volatility has been the account's core instability — this rebuild brings it under control.
- Target: stabilise weekly spend within a consistent range aligned to your target monthly budget (see Questions slide).
- Efficiency (cost per lead) is the metric to watch from Week 3 onwards, once the rebuild stabilises.
- First clean performance read: Week 2-3 after Google's learning phase completes.

- **Monday's tracking audit confirms conversion reliability — the gate to CPA analysis.**
- **Week 2 performance comparison vs Week 1 will be the first post-rebuild read.**
- **Please confirm target monthly budget so I can lock weekly pacing (see Slide 10).**

Client Clarifications & Actions

Client Reply

Giulio replied Fri 17 April 16:47 · actions captured

Confirmed by Giulio

- Consultation: Free + £25 booking deposit
- Lead → Booking rate: 13%
- Booking → Treatment rate: 35%
- Patient base: 10,000 patients, 20,000+ implants placed
- 25+ years team-wide expertise in dental field

Compliance Actions Required

- Remove '99.12% success rate' from all ads — confirmed estimate
- Remove 'Save 60%' — no source benchmark
- Reword 'Top 10 Europe' → factual descriptor (self-claim, not award)
- Reword 'Best Implant Clinic 2024' → '2024 Finalist'
- Update ad copy: 'Free Consultation (£25 booking deposit)'

Advertising Scope

- DBD only advertises dental implants (single + double arches) — confirmed by Giulio.
- Cosmetic and general dentistry services deferred for now.
- All campaigns aligned to this focus: Brand, PMax, Dental Implants Intent.

- **Applying all compliance changes Monday 20 Apr: removing unverifiable claims, updating consultation pricing.**
- **Replacing '2,500+ patients' claim with '20,000+ implants placed' across relevant ads.**
- **AG22-25 Ad Strength audit resumes Tuesday (ads currently Pending Google review).**

Questions for Client

Your Input

To refine strategy, I need clarification on a few things

Budget Questions (Urgent)

Question	Why It Matters	Answer Needed By
What is your target monthly ad spend?	Weekly spend fluctuated £8k-£17k over 8 weeks. Target budget drives bid and budget decisions.	Mon 20 Apr
What is your target weekly ad spend?	Weekly consistency drives campaign pacing. Current daily budgets sum to ~£14k/week but actual is ~£8.5k.	Mon 20 Apr
Is there a hard monthly ceiling?	Prevents overspend and informs daily budget caps across 3 campaigns.	Mon 20 Apr
Priority service: single or double arch?	Higher-margin service should carry higher bid caps and budget share.	1 week

How to Reply

- Reply to this email with answers to any questions — no need to answer all at once.
- Or we can cover these on a 20-30 min call whenever convenient.
- Urgent questions (budget) need answers by Monday so Week 2 work isn't blocked.

Why These Matter

- Every piece of clarification feeds directly into bid strategies, budget allocation, and ad copy.
- The more I know about your business, the more precisely I can tune the account.
- Example: the 8-week spend volatility (£8k-£17k range) is what happens when budgets aren't locked to a target — pinning your target spend eliminates this.

Week 2 Plan

5 Working Days

Monday 20 Apr — Tracking Audit

- Verify form_submit fires on all landing pages End-to-end validation across every Search campaign LP
- Verify Dengro Offline Lead / Booking / Purchase reliability
- Confirm why Bookings fired 0 times in Week 1 — reporting gap or genuine zero?
- Audit attribution windows and conversion counting
- Ensure Dengro leads aren't being double-counted or missing
- Gate for all CPA analysis. No CPA-based decisions until tracking is confirmed reliable

Tue 21 – Thu 23 Apr — Execution

- Apply Giulio's claim corrections across all ads (Tue) Remove 99.12%, Save 60%; reword Top 10, Best Clinic
- Resume AG22-25 Ad Strength audit once Google clears Pending (Tue)
- RSAs to audit once review completes
- Second pass on AG1-21 ads not yet at Excellent (Tue) Push remaining RSAs over the line
- PMax asset rebuild (Wed) Policy-safe copy, verified claims only, restores full reach
- Ad extensions deployed (Thu) Sitelinks, callouts, structured snippets, first time the account has a complete set

Friday 24 Apr — Review + Report

- 7-day performance comparison vs Week 1 Spend, leads, CPA — first post-rebuild signal
- Brand matures, PMax settles, DII still learning Different campaigns on different learning trajectories
- Week 2 end-of-week report delivered EoD Friday
- Same format as this report — trend, insights, Week 3 plan

Week 2 is about execution: tracking audit unblocks CPA analysis, claim corrections unblock compliance, PMax rebuild unblocks reach.

What's Next

Rolling priorities beyond Week 2

1. Cosmetic dentistry campaign build
2. Landing page optimisation
3. Long-tail keyword expansion
4. Conversion rate improvements
5. Monthly review cycle
6. End-of-month report

Coming Next

Week 2 Report

- Weekly performance review,
- tracking audit findings,
- PMax rebuild results,
- Week 3 plan. Delivered EoD Friday 24 April.
