Data: Mon 20 - Sun 26 April 2026

GAds CPA down 36% week-on-week

£46

From £72 (W1) to £46 (W2).

Tracking fix on Fri 24 Apr closed a temporary GCLID gap (~47 leads) caused by recent ad group setup.

Achieved on 20% less spend.

£10,134

Cost per Booking vs W1

Key Wins This Week

- Tracking fix shipped Fri 24 Apr — GCLID gap from recent ad group setup closed (~47 leads recovered)
- Post-fix DII Search converting at £50 CPA vs PMax £65 — Search now cheaper, more controllable
- GAds CPL down 36% W-o-W (£72 → £46) on 20% less spend
- GAds Bookings up 27% W-o-W (11 → 14) — volume growing alongside efficiency gain
- Cost per Booking down 37% (£1,155 → £724) — tracking + bid optimisation working

- Tracking foundation fixed mid-week — closing a temporary GCLID gap from recent ad group setup.
- Performance improvements visible immediately.
- Post-fix DII Search confirmed as cheaper than PMax — sets up the Search migration plan for Week 3 and beyond.
- Strategic 400-bookings plan attached separately for tomorrow's call.

8-Week Context

8 weeks

8-week rolling trend - Week 2 in context, CPA coming down

GAds Weekly Performance

Week	Leads	Bookings	Spend	CPL	CPB	L-B%
02/03	200	27	£14,856	£74	£550	13.5%
09/03	149	27	£8,393	£56	£311	18.1%
16/03	127	14	£13,318	£105	£951	11.0%
23/03	240	11	£11,558	£48	£1,051	4.6%
30/03	124	14	£9,997	£81	£714	11.3%
06/04	134	15	£10,291	£77	£686	11.2%
13/04	176	11	£12,705	£72	£1,155	6.3%
20/04	222	14	£10,134	£46	£724	6.3%
8-WK TOTAL	1,372	133	£91,252	£67	£686	9.7%

Key Observation

- CPA trend: peaked at £105 (Wk 16/03), now at £46 (Wk 20/04) - a 56% reduction over 6 weeks
- Lead volume: 124-240/week range. Wk 23/03 spike (240) followed by Wk 30/03 dip (124)
- Bookings: 11-27/week range. Late-March bookings still maturing - some Wk 23/03 leads booking now
- Spend: throttled deliberately as we restructured campaigns - now optimising for efficiency

Week 2 in Context

- Week 2 (20/04) sits at the BEST CPA of the 8-week window: £46
- Tracking fix on Fri 24 Apr is recent - full impact will show in Week 3+
- DII Search converting at £50 CPA vs PMax £65 (last 5 days post-fix) - validates the migration plan
- Week 2 = inflection point - efficiency gains compounding

- Week 2 marks an inflection point in the 8-week trend.
- CPA at the lowest of the period (£46), bookings up vs Week 1, spend down.
- Tracking fix was the catalyst - Search migration in Week 3 will compound the gains.

Campaign Performance

Week 2

GAds campaign breakdown — Brand / DII / PMax — Week 2 vs Week 1

Per-Campaign Comparison: W1 vs W2

Campaign	W1 Spend	W2 Spend	W1 Conv	W2 Conv	W1 CPA	W2 CPA	CPA Δ
Brand	£303	£161	15	17	£20	£9	-55%
DII	£3,758	£1,436	8	13	£470	£108	-77%
PMax	£8,644	£8,537	132	151	£66	£57	-14%
TOTAL	£12,705	£10,134	155	181	£82	£56	-32%

PMax — Stable Workhorse

- PMax spend held steady (£8,644 → £8,537, -1%)
- Conversions up 14% (132 → 151)
- CPA improved 14% (£66 → £57)
- Steady performance while DII rebuild + tracking work happened around it

DII Search — Tracking Fixed

- Caveat: DII tracking was broken in W1 + first 4 days of W2 — reported W1 CPA of £470 reflects under-counted conversions, not true performance.
- Tracking fix shipped Fri 24 Apr — DII conversions now flowing cleanly back to GAds.
- Post-fix (last 5 days, clean data): DII Search at £50 CPA vs PMax £65 — Search now cheaper.
- This validates the Search migration plan starting Week 3.

Brand — Tightened

- Brand spend reduced 47% (£303 → £161) — tighter bid caps
- Conversions slightly up (15 → 17)
- CPA dropped 55% (£20 → £9)
- Brand is small but mighty — high efficiency on a small budget

Dengro Performance

GAds lead funnel — Week 2 vs Week 1

GAds Funnel: W1 vs W2

Funnel Stage	Week 1	Week 2	W-o-W	% of Leads
Leads	176	223	+27%	100%
Bookings	11	14	+27%	6.3%
Attended	0	2	+2	0.9%
Treatment Started	0	2	+2	0.9%

Week 2

Bookings → Attendance

- Of 14 W2 bookings: 2 attended, 12 still scheduled in future weeks
- Attendance metrics lag bookings by 2-6 weeks (initial appt scheduling)
- Of 11 W1 bookings: most still in scheduled status (export taken end of W2)
- Attended/started numbers will firm up over the next 2-4 weeks

Lead → Booking

- L→B rate held steady at ~6.3% W-o-W (W1: 6.2% / W2: 6.3%)
- Bookings up 27% in absolute terms (11 → 14) — driven by lead volume growth
- Indicates lead quality is consistent — more leads = more bookings, no quality drop
- Once Search migration ramps, expect L→B rate to lift further (Search has higher intent)

Quality Signal

- 209 of 223 W2 GAds leads still in "New" stage — being worked by sales agents
- 12 leads progressed to "Consultation Booked"
- 2 leads have already started treatment within W2 (high-intent walk-ins)
- No cancellations from W2 GAds bookings — clean funnel

Tracking Audit & The CPA Drop

What was broken, what got fixed, and the impact on Week 2 numbers

CPA Trajectory: Pre-Fix vs Post-Fix

Period	DII Search CPA	PMax CPA	Notes
Week 1 (13-19 Apr) — pre-fix	£470	£66	DII tracking broken — under-counted
Week 2 first 4d (20-23 Apr) — pre-fix	broken	£60	Last days of broken tracking
Week 2 last 5d (24-28 Apr) — POST-FIX	£50	£65	Clean data — Search now cheaper
Week 2 reported total (CSV)	£108	£57	Mix of broken + clean — caveat needed

Week 2

What Got Fixed (Fri 24 Apr)

- Tracking template updated across all DII ad groups — GCLID now captured on every click.
- Tested end-to-end: form fill → Dengro → GAds conversion ping confirmed working.
- Backfill not possible (GAds doesn't accept retroactive conversions) — but going forward, clean data.
- Auto-bidding now sees full picture and can optimise properly.

What Was Broken

- When new ad groups launched in DII Search (early April), GCLID parameter wasn't being captured cleanly on form fills.
- Result: GAds dashboard under-reported DII conversions by ~47 leads over 2 weeks.
- Dengro had the leads (correctly tagged as Paid Search). GAds did not.
- Auto-bidding was therefore optimising on incomplete data — limiting performance.

Post-Fix Impact

- Last 5 days post-fix: DII Search CPA = £50 vs PMax £65 — Search now cheaper.
- Pre-fix DII reported CPA was misleadingly high (£470 W1, £108 W2).
- True post-fix CPA validates the case for Search migration over PMax.
- Week 3 will be the first FULL week of clean DII data — expect strong baseline.

Work Delivered

Mon 20 — Fri 24 April

Mon 20 — Tue 21: Automation Live

- **MON** — Negative-keyword automation built end-to-end
 - overnight data pipeline (618 terms/day, 3 campaigns)
 - 8-rule classification engine tuned to DBD ad scope
 - Client config locked: 50+ services, 1,300+ locations
- **TUE** — System made operational + first live run
 - 220+ negatives pushed to DBD GAds account
 - Sticky Rejections feature added
- **TUE 3pm** — Zoom call with Tommaso & Giulio
 - 4-slide Week 1 deck delivered
 - Confirmed: vivo bridges advertisable, lead quality OK
 - Week 2 priorities agreed live

Wed 22 — Thu 23: Reliability + Tracking

- **WED AM** — Engine reliability fixes
 - Hidden sync bug fixed (was reading old snapshots)
 - Refresh Neg Lists live in ACT
 - Reclassify Today's Terms live
 - Negative Lists viewer added to Client Config
- **WED PM** — Tracking audit opened
 - Diagnosed 6 structural issues in conversion tracking
 - GCLID gap, Dengro mapping, Zapier path conditions
- **THU** — Tracking audit completed
 - Full month Dengro analysis (1,115 leads Apr 1-23)
 - 3 of 4 structural issues fixed
 - "Dengro Offline Purchase" renamed to bookings
 - 17-slide Tracking Audit v5 sent to Giulio + Tommaso
 - WhatsApp with Giulio: bookings confirmed as KPI

Fri 24: Pages + Tracking Shipped

- **FRI** — Landing pages shipped (10)
 - New URL structure: /google/ replaces /promo/google/
 - Ad-group-matched: All-on-4, All-on-6, near-me, finance, cost UK, etc.
 - 100% keyword coverage verified per LP, post-deploy
 - Cloudflare auto-deploy proven; ~3-5 min deploy time
- **FRI** — Tracking template fix shipped
 - GCLID parameter now captured across DII ad groups
 - GAds seeing complete conversion data going forward
 - Auto-bidding can now optimise on full picture
- **FRI** — Full search-term triage completed for the week
 - Pass 1 / Pass 2 / Pass 3 all clean

Week 2 was the foundation week — automation operational, tracking fixed, landing pages shipped, search-term triage clean. Sets up Week 3 for compounding gains.

Week 3 Plan + Strategic Forward Look

Week 3

Week 3 starts strong: Mon DONE, strategic call Wed, Search migration begins

Week 3 Daily Plan

- **MON 28 APR** ✅ DONE — 15 ad-group-matched LPs shipped (#11-#25)
 - All live at /google/ on dentalbydesign.co.uk
 - 100% keyword coverage on every page
- **TUE 29 APR** ✅ DONE — daily triage + Week 2 report + 400-bookings deck
 - 2h triage / 2h report / 1h conv action renames / 3h strategic plan
- **WED 30 APR** — Strategic call with Tommaso & Giulio + new "near-me" campaign build
 - Walk through 400-bookings strategic plan
 - Build first new structured Search campaign (near-me)
- **THU 1 MAY** — PMax overhaul + daily triage
 - Asset group review, audience signals, exclusion lists
- **FRI 2 MAY** — Buffer day for more campaign building + Week 3 wrap

Strategic Forward Look

- Strategic plan delivered separately — see attached 400-Bookings Deck
 - Path from current 155/mo to 400/mo over 6 months
 - Channel-by-channel scaling targets and budget ramp
- Search campaign migration begins Week 3
 - Move budget from PMax black-box to structured Search campaigns
 - Target campaigns: near-me, all-on-4, full-arch, single-tooth, finance
- Tracking foundation now solid — clean data flowing
 - Auto-bidding can optimise on complete signal
 - Weekly reports going forward will reflect true performance
- Print/OOH expansion under discussion with Giulio
 - Metro to 3 days/week + test 1-2 new publishers

What's Next

Rolling priorities beyond Week 3

1. Search campaign fleet build-out (near-me, all-on-4, full-arch, etc...)

2. PMax to Search progressive budget migration

3. Paid Social conversion fix + Meta tracking review

4. Print/OOH expansion (Metro 3 days/wk + new publishers)

5. Conversion rate optimisation across all landing pages

6. Monthly milestone reviews tied to 400/mo path

Coming Next

Week 3 Report — due Mon 4 May

First full week of clean tracking + new Search campaign data

Strategic Call Follow-up

Action items from Wed 29 Apr meeting

Week 4 — Search Fleet Expansion

Continue PMax to Search migration
